THE TIMES OF INDIA

Nurturing New Age Leaders

Certain questions often come to our mind like how to nurture new age leaders? It is possible to pave a new pathway and create a more fulfilling, nurturing, empathetic and compassionate environment for children and also

making them feel empowered. Metamorphosis change is a much needed impetus for the growth of human society. Reforms are needed in each and every field especially in education.

SFS is proud to announce it is following a new curriculum that has integrated salient features of NEP 2020. It focuses on the development of 21st century skills while instilling ethical, rational creative skills in learners. The modified textbooks and learning resources have been made available from the academic year 2022-23. The content framework of SFS's new curriculum is based on the 7E instruction- Elicit, Engage, Explore, Explain, Elaborate, Evaluate and Extend. It will also accommodate the 4C's of 21st century learning skills- Critical Thinking, Creativity, Collaboration and Communication.

The upgraded curriculum ensures learning goes beyond the

classroom by way of application of knowledge in real world. Self assessment and peer assessment equip students to engage in regular SWOT analysis and help them work on strengths, weaknesses, opportunities and threats.

Integrating NEP 2020 powered curriculum facilitates three core objectives- Personal learning , collaboration between students and teachers, invite par-

ents to partner in their child's learning journey.

The school's balanced schooling pedagogy through its-learn, reinforce, practice and apply methodology paves the way for students to excel in academics while shaping their creative, sporting and musical aspirations.

SFS has adopted the concept of gamifying lessons and worksheets . Instead of traditional quizzes or tests, teachers incorporate gamified assessments. Virtual simulations used in science classes which provide students with interactive experiences that mimic real world scenarios. The school has invested in ensuring a tech-adaptive infrastructure.

The school believes connection is crucial for enhancing the sense of belonging, increasing classroom engagement and cultivating a caring classroom culture. By tailoring the content and activities to individual interests, learning styles and strength allow them in creating a more engaging and motivating learning experience. By making students feel special, SFS encourages their active involvement, boost their confidence and promote a positive attitude towards learning.
